- This technology will deter all bird sizes and type from sparrow, swallows to pigeons. We also have a range of units for outside locations with solar power supplies.
- There are a range of different lasers we manufacture ranging from scater pattern to solid spot. The choice is dictated by the location and obstacles we need to avoid.
- We also provide varying rotaional mounts from pre set rotation through to fully programmable to be very specific of the area to deter birds.
- Automated times of operation.

Please contact our team for advice or a site inspection to provide the best soluuioun. We only have approved technicians for inspections to identify the best positioning for maximum effect while consideration to health and safety.
